

# The Commercial Business Advantage.

## **Savings. Dependability. Control.**

UGI Energy Services understands the unique challenges of operating a commercial business. That's why we customize smarter energy-buying strategies for a variety of business types. In fact, UGIES can help just about every company access our cost-saving programs—from individual property managers to interstate chain-style operations.

We are your go-to resource for natural gas, electricity and liquid fuels, providing quick response to market conditions, guidance to help you make better decisions, and access to reliable energy supplies.

## **Natural Gas**

Independent from pipelines and producers, UGI Energy Services simplifies the process of purchasing natural gas for your business while providing supplies at competitive prices—helping you manage expenses better.

## **Electricity**

Instead of relying on your default electric distribution company, discover the potential savings on your electric bills with UGI Energy Services. We offer reliable and cost-effective electric supplies to keep your business moving forward. Our electric generation assets and energy management experience help customers achieve reliable savings compared to traditional electric utility options.

Serving customers in nine states and Washington DC, UGI Energy Services is poised to grow with the deregulated electricity market and provide reliable generation to power your success.

## **And Great Customer Service**

Everyone at UGIES understands that the customer comes first. So when you have questions about your agreement, or a concern about market conditions, we're ready to help—serving you better every day so you can focus easier on your customers and your business.
