

The Institutional Advantage.

Savings. Dependability. Control.

UGI Energy Services understands the unique challenges of operating an institution. That's why we customize smarter energy-buying strategies for many types and sizes of institutional facilities. For example, we can customize energy-buying plans for small satellite healthcare clinics as well as for major health system complexes. Likewise, all sizes of educational and religious institutions can take advantage of our cost saving plans.

We are your go-to resource for natural gas, electricity and liquid fuels, providing quick response to market conditions, guidance to help you make better decisions, and access to reliable energy supplies.

Natural Gas

Independent from pipelines and producers, UGI Energy Services simplifies the process of purchasing natural gas for your business while providing supplies at competitive prices—helping you manage expenses better.

Electricity

Instead of relying on your default electric distribution company, discover the potential savings on your electric bills with UGI Energy Services. We offer reliable and cost-effective electric supplies to keep your business moving forward. Our electric generation assets and energy management experience help customers achieve reliable savings compared to traditional electric utility options.

Serving customers in nine states and Washington DC, UGI Energy Services is poised to grow with the deregulated electricity market and provide reliable generation to power your success.

And Great Customer Service

Everyone at UGIES understands that the customer comes first. So when you have questions about your agreement, or a concern about market conditions, we're ready to help—serving you better every day so you can focus easier on your students, staff, patients, residents or congregation.
