

# The National Account Advantage.

## **Savings. Dependability. Control.**

UGI Energy Services understands the unique challenges of operating nationally. That's why we apply proven energy-buying strategies to help you minimize risk, control costs and preserve profitability.

We are your go-to resource for natural gas, electricity and liquid fuels, providing timely response to market conditions, guidance to help you make better decisions, and access to reliable energy supplies.

With UGIES, you can simplify management tasks by sustaining one relationship with a single vendor who will manage all your individual assets and activities for maximum savings. As experienced partners, we:

- Consolidate and streamline multi-location facilities
- Analyze individual risks and develop customized strategies
- Provide smart pricing programs, including layering, market triggers, etc.
- Monitor commodity markets in real time
- Assist in load estimation and nominations
- Follow up with customized reporting
- Deliver 125 years of energy management experience

## **Natural Gas**

Independent from pipelines and producers, UGIES simplifies the purchasing process while providing reliable supplies at competitive prices.

## **Electricity**

Serving customers in nine states and Washington DC, our electric generation assets help customers in deregulated markets achieve reliable savings compared to traditional electric utility options.

## **Liquid Fuels**

When you need fuel oil (all grades) or propane gas, UGIES can connect you with reliable full-tank deliveries via rail or roadway.

It's easy to see why UGIES is the premier energy provider for thousands of customers. We are ready to serve you, too.
